- Weather-sealing protects from dust, light rain and snow
- AF/MF switch enables you to be in full control and capture the finest details

Tiny but All-Around

E Mount AF Auto Focus Light Weight Compact Size Aspheric lens 9 Aperture Blades
This lightweight F1.8 lens is specifically designed for 3 main targets: street photographers, vloggers, and Instagrammers who are looking for a compact lens with high-quality output. The new lens provides outstanding corner-to-corner image quality

from a maximum F1.8 aperture and its quiet autofocus and tenacious tracking performance make it a great choice for both stills and movie shooting.

Large F1.8 Aperture for the Most Loved 35mm Focal Length

35mm is one of the most loved focal lengths of all time for its versatility from indoors to landscapes and even portraits. It frames the background and subject perfectly with a wide enough angle of view. Also, a large F1.8 finds a perfect balance between portability and image quality. The wide aperture lets in more lights, creating a sharp and high-resolution image with fast shutter speed to capture every moment.

Full-frame Performance in Ultra-Compact Size & Lightweight

Weighing in at just 210g/7.4oz and measuring 65mm/2.55in in diameter by 63.5mm/2.5in in length; this new lens sets a new standard for portability as a Samyang Tiny Series lens. It supports full-frame mirrorless cameras in Sony E mount with outstanding image quality throughout the corner to corner of the image. It makes an ideal lens for street photographers, vloggers, and Instagrammers who expect a high-resolution image from a portable lens. Its optical construction including an aspherical element to suppress aberration and deliver high resolution throughout the entire image frame.

Enables beautiful bokeh with 9-circular blades

9-blade circular aperture delivers amazingly beautiful and soft bokeh.

Versatile control and handling for a wide range of imaging with the Custom Switch

Equipped with the Custom Switch, shooting and operation are more intuitive and simple. You can easily select various functions such as Aperture Control Mode or MF Mode from the Switch, and enjoy the shooting mode that suits your personal preference. More functions will be added through firmware updates in the future.

Fast, quiet and accurate Auto Focus with excellent tracking for videos as well as stills

Now Autofocus needs to consider not only how more accurately and quickly it captures images, but also how quiet and smooth it is. Thanks to the newly researched and developed Linear STM (Stepping Motor), a larger and heavier focus lens group can be controlled more quietly and precisely, providing excellent image quality in photos and videos.

Weather Sealing for protection from external influences

This new Tiny Series lens, the AF 35mm F1.8 FE, features weather sealing for 4 spots to protect from light dust, rain and snow and provide the ability to capture stunning images in less than perfect conditions.
