## Thunderbolt Multiplied – Turn One Thunderbolt Port into Three

### Truly Universal Connectivity for Work and Play

The Echo 11 Dock features four Thunderbolt 4 ports; one for connection/power to your computer, plus three to directly connect Thunderbolt peripheral devices (and daisy chain up to a total of 5 devices). The Thunderbolt ports also support USB4 and USB 3 peripherals. For connected peripherals using bus power, the Dock's Thunderbolt peripheral ports provide 15W per port, supporting even the most demanding bus-powered Thunderbolt and USB peripherals.

### Versatile Thunderbolt Expansion

Perfect for Mac® and Windows® computers, including Apple® M1 Macs with limited Thunderbolt ports. Connect the dock and create three separate independent Thunderbolt expansion chains. Add and disconnect devices from one chain without affecting the others.
