Convert SFP+ Sockets Into 10GBASE-T Copper Ports

Sonnet's 10GBASE-T SFP+ Transceiver transforms an SFP+ socket into an RJ45 (10GBASE-T) port, enabling 10 Gigabit Ethernet (10GbE) networking over cost-effective CAT-6A copper cables for runs up to 30 meters between ports. Whether used for switch-to-switch uplink or stacking connections in an Enterprise or SMB network, or

for switch-to-server or storage system connections in a data center, or even for a client-to-switch link, this transceiver makes it simple to add copper connectivity where you need it.
