- Autobright technology for optimal visibility
- Clear and high-contrast images
- Reliable integrated compass*
- Robust and reliable

* Navigator Autobright 7x50c only

Discover the new Navigator Autobright from Steiner - your reliable companion on the water! With the innovative Autobright technology, the brightness is automatically adjusted to the respective lighting conditions to always offer you the best view.

Whether the sun is just below the horizon, shining directly above you, or dazzlingly reflecting off the water, Navigator Autobright ensures you get clear, high-contrast images. This sunlight-adaptive lens technology is designed to capture the right amount of light and reduce glare for optimal visibility - regardless of the changing conditions at sea.

With its user-friendly design and easy handling, the Navigator Autobright is ideal for anyone who values safe and clear visibility in their maritime activities. Count on this navigator with Autobright technology to be your reliable partner for all activities at sea - come sunshine or bad weather! Navigate with confidence and real performance thanks to the new Steiner Navigator Autobright.

Autobright technology for optimal visibility

The outstanding Autobright technology automatically adjusts the brightness to the respective lighting conditions. No matter whether at sunrise, on a reflective water surface under bright sunlight or in difficult weather conditions - the Navigator Autobright always guarantees the best possible view.

Easy to use in any weather

Thanks to the innovative "Open Bridge System", the Navigator Autobright enables safe one-handed operation, even under demanding conditions on the high seas. The wave-like rubber armour texture not only provides a firm grip but also repels water to ensure non-slip handling in heavy seas.

Clear and high-contrast images at every opportunity

The proven STEINER high-contrast optics ensure bright and high-contrast images with high contour sharpness and natural colour reproduction. With the Navigator Autobright, you will always experience impressive image clarity.

Reliable integrated compass*

The Autobright technology is complemented by an analog liquid-damped compass that is not only shock-absorbing but also precise and illuminable. This means you always have the correct orientation at sea in mind.

* Navigator Autobright 7x50c only

Robustness and reliability

Developed in close cooperation with professional sailors, the Navigator Autobright relies on the legendary STEINER robustness. These binoculars are designed to perform reliably and efficiently even in the most difficult conditions, so you can always rely on your companion.
